Title of Invention

An oral composition

Claims

[Claim 1]

An oral composition, characterized in that it is formed by mixing into an oral composition comprising alkyl sulfate and 1% by weight or more of water soluble polyphosphate based on the total weight of the oral composition, orthophosphate at a weight ratio of 0.2 times or more the water soluble polyphosphate.

[Claim 2]

The oral composition according to claim 1, which further comprises one or more surfactants selected from the group consisting of N-acylamino acid, salts thereof, and polyoxyethylene alkyl ether sulfate.
